

CSS Background Image

[< Previous](#)[Next >](#)

CSS background-image

The `background-image` property specifies an image to use as the background of an element.

By default, the image is repeated so it covers the entire element.

Example

Set the background image for a page:

```
body {
  background-image: url("paper.gif");
}
```

[Try it Yourself »](#)

Example

This example shows a **bad combination** of text and background image. The text is hardly readable:

```
body {
  background-image: url("bgdesert.jpg");
}
```

[Try it Yourself »](#)

Note: When using a background image, use an image that does not disturb the text.

The background image can also be set for specific elements, like the `<p>` element:

Example

```
p {
  background-image: url("paper.gif");
}
```
